

Participants Needed

We are investigating the effect of a 6-week protocol of a dietary supplement, Lumbrokinasse, on individuals with the following diagnoses:

- **LongCovid**
- **ME/CFS (Myalgic encephalomyelitis/chronic fatigue syndrome)**
- **Post-treatment Lyme disease syndrome**

Compensation
\$125

We are conducting a research study that includes five (5) in-person visits over the span of 12 weeks

The study involves in-person assessments, blood draws, and completion of online surveys

You need to:

- **Be 18 or older**
- **Meet one of the above criteria**
- **Live in the NYC area**

Location:

5 East 98th St, SB-18

STUDY 24-00154
Principal Investigator:
David Putrino, PT, PhD

Icahn School of
Medicine at Mount Sinai
